

Evotec Licenses CRISPR Tech From Broad Institute, Harvard

Jul 06, 2016 | [a GenomeWeb staff reporter](#)

NEW YORK (GenomeWeb) – Evotec announced today that it has acquired a non-exclusive license to CRISPR-Cas9 genome-editing technology from the Broad Institute and Harvard University.

Under the terms of the deal, Evotec may use the technology for its drug-development and R&D activities, including in the development of research tools and in target identification, as well as to strengthen its post-phenotypical screening target deconvolution platform.

Additional terms of the arrangement were not disclosed.

The Broad — a partnership between Harvard and the Massachusetts Institute of Technology — has issued a number of licenses to its CRISPR-Cas9 technology recently, including ones to [ATCC](#), [Transposagen](#), [GE Healthcare](#), and [Sigma-Aldrich](#).
